Notes:

- (1) Scheme C is the share option scheme adopted by the Company on March 28, 2002 and has expired on March 27, 2007. The Company adopted Scheme D on May 29, 2007.
- (2) No option was cancelled during the period.
- (3) The weighted average closing price of the Company's shares immediately before various dates on which the share options were exercised was HKD9.14.

(4) The following significant assumptions were used to derive the fair values using the Black-Scholes option pricing model:

Date of grant	Exercise price HKD	Expected life of share options	Expected volatility based on historical volatility of share prices	Hong Kong Exchange Fund Notes rate	Expected annual dividend yield
For the period ended June 30, 2012 21.5.2012	8.742	3 years	41%	0.298%	1.5%

The share options are vested in whole or in parts over 3 years from the date of grant.

For the purposes of the calculation of fair value, no adjustment has been made in respect of share options expected to be forfeited due to lack of historical data.

The Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share price. Because changes in subjective input assumptions can materially affect the fair value estimate, in the directors' opinion, the existing model does not necessarily provide a reliable single measure of the fair value of the share options.

The closing price of the Company's shares on the date of grant was HKD8.57 per option.

Expected volatility was determined by using the historical volatility of the Company's share price over the previous 3 years. The expected life used in the model has been adjusted, based on management's best estimated, for the effects of non transferability, exercise restrictions and behavioural considerations.

The Group recognised a total expense of USD226,000 for the six months period ended June 30, 2012 in relation to share options granted by the Company.

The fair value of the share options granted in the period was HKD2.11 per option.
