

STILETTO® sets the standard with premium Titanium hand tools and hammers that are 45% lighter than steel, while providing the same striking force and strength. In addition, Titanium tools produce 10X less recoil shock, which means less down time due to injury, more productivity and most importantly less pain while getting the job done.

As a truly premium brand, owning a STILETTO® product is a point of pride for carpenters. Users often send in pictures of their STILETTO® tattoos and personal stories of how our tools eliminated the inflammation and pain that once plagued them on the job.

APPLICATION-SPECIFIC TOOLS

Tools such as the Lath and Drywall Axes provide the benefits of lightweight titanium in specialty applications. That means less fatigue at the end of a long work day.

HART
